General...

In this ever changing fashion world, fashion is incomplete without an innovative bottom made out of Denim or Non Denim Styles/fabrics. These innovative bottoms comes in all forms, looks & washes...same like Denim to match with every attire we want to wear get noticed... Same denim which was originated way back in West Coast (USA) to make carpenter wear or workers overall, is not turned as a cash crop of fashion industry & become ICON over a period of time.

DENIM....A need of everyone to be in Vogue !!!!

A large number of technological factors have contributed to making **THE DENIM, a FASHION STATEMENT** of the industry, but, the major + important role is being played by its **Director...that we called as WASHING TECHNIQUES**, which has given an edge & newness to denim, which any customer is looking for in a product.

So, keeping this innovation into consideration, we also come forward & set-up a new mile stone, (under the **JOINT flagship of Sterling Styles Limited & Bando Design Limited**) with a new inventions of **BLUE CREATIONS LIMITED!!! (BCL)**, with a slogan – **The Options are unlimited...which we create for our valuable customers across the globe as per their requirements.**

BLUE CREATIONS LIMITED !!!

THE OPTIONS ARE UNLIMITED

Introduction...

BCL...is the latest invention of Sterling Styles Limited & Laila Group. It become operational in April'2017. A washing plant with an edge with state-of-the art set-up in Bangladesh, which is outstanding in all respects with a scope of improvement to become extraordinary by way of meeting the desired parameters of our valuable customers with a flexibility of BCL to accept & adopt the same for a better tomorrow...

We have not compromised at any point of time while investing into latest technology, machines, infrastructure, quality& into our people. BCL...is equipped with all latest technology machines followed by a micro-processed controlled E-Class wet & dry process handled by the world class best technician with their support teams.

This unique washing plant not only takes care of world class washing to the satisfaction of our valued customers, but, also adheres our commitment towards a clean & Green environment, hence, this plan tis support by a well planned integrated Bio-Chemical Effluent Treatment Plant (ETP) to ensure NO HARM TO ECOLOGICAL ENVIRONMENT.

Effluent Treatment Plant (ETP)...

Our washing facility is equipped with Bio-Chemical Effluent Treatment Plant (ETP) based on the International norms of compliance required by all of our esteemed customers & new partnerships.

This ETP helps us to work eco-logical & will help to decontaminated the waste water before disposal

As washing needs a treated water for demanding purposes such as Environmental Discharge Compliance, hence, this ETP produces organic & mineral sludge's from the chemicals used in washing & reprocess it for re-using & disposal of waste water by way of filtration & sedimentation before its disposal by way of maintaining the desired PH Value of the water & our commitment towards clean & Green environment.
